In-class Exercise

<u>You need to submit:</u>
- Everything you have as a zip

Image 1:

Image 2:

- The source code you received generates a webpage that look like image 1.
- Frist, enable the JavaScript by removing the comments in HTML file. This should be the only thing you change in the HTML file.
- **Modify only the JavaScript file** to make the page look like image 2 by completing the following steps:
    1. ADD NEW ITEM TO END OF LIST
    2. ADD NEW ITEM START OF LIST
    3. ADD A CLASS OF "cool" TO ALL LIST ITEMS
    4. ADD NUMBER OF ITEMS IN THE LIST TO THE HEADING
- Do not change file names
- Put your work on GitHub in such a way that we can view it in a browser (not just your JavaScript file!). The page must be published using GitHub Pages so that we can get to it via the URL:
http://<*your_user_name*>.github.io/<*your_repository_name*>/<*your_file_name*>
